Turn your computer into an aquarium!

Fishies™

At last, a use for the personal computer!

System requirements:
Apple II Plus, IIe, or IIc
One disk drive
48K
Optional: color monitor

Fishies

Apple® Edition

Fishies *is the software that turns your computer into a life-like aquarium filled with aquatic creatures. Just load the program, sit back, and relax as your* **Fishies** *go about their fishy business. You'll see swordtails, angelfish, goldfish, seahorses, tiger barbs, and diamondfish swimming past your screen among underwater ferns and rocks.*

You can interact with your **Fishies:** *feed them; tap on the glass. For more excitement, press the space bar to initiate some special underwater events. Get ready—you might just see a mermaid!*

The days when you quivered with fear that another visiting friend would ask you, "What does your computer do?" and you would have to show them a boring—not to mention embarrassing—spreadsheet, are over. Now impress and delight everyone you know when you fill the blank eye of your monitor with the dazzling display of **Fishies.**

Fishies *is economical. Hours of watery fun running Fishies on your computer will use only the amount of electrical power needed to run a desk lamp for the same amount of time.*

You'll see: with **Fishies,** *the fun never ends.*
